Client Alert

Stimulus to Provide Unprecedented Government Assistance to US Businesses (UPDATE)

March 30, 2020

On March 27, 2020, the President signed into law the Coronavirus Aid, Relief, and Economic Security (CARES) Act, a \$2 trillion economic stimulus and relief package aimed at stabilizing the economy through support of large and small businesses alike. While details will continue to emerge on the specific provisions of the package, many of the COVID-19 stimulus programs contained in this legislation will likely build off of pre-existing government programs.

We intend to update this communication as information becomes clearer, but details that are currently available indicate that businesses in need of additional capital and financing, among other forms of relief, may be able to take advantage of the programs below. If you have any questions regarding the CARES Act or how it may affect your company, please contact the authors of this alert or your O'Melveny advisor.

Term Asset Backed Securities Loan Facility (TALF)

The US Federal Reserve created the TALF program in November 2008 to boost consumer spending in order to help jumpstart the economy in response to the global financial crisis. The TALF is a credit facility authorized under section 13(3) of the Federal Reserve Act intended to help meet the credit needs of

consumers and small businesses by facilitating the issuance of asset-backed securities (ABS) and improving the market conditions for ABS more generally. Since the last loan maturity date in January 2015, the TALF Program has remained dormant. On March 23, 2020, the Federal Reserve announced that it would be reopening the TALF. Specific details are pending.

Program	Eligibility Requirements	Purpose	Program Size/Terms	Application Process	Limitations
TALF	All US companies that own eligible collateral and maintain an account relationship with a primary dealer	Create incentive for consumer and business loans by providing liquidity for new asset- backed securities	Total Program Funds: Initially \$100 billion and up to \$700 billion Rate: 100 basis points above LIBOR swap rate based on life of securities	Awaiting Details – anticipated that terms and conditions will be based on those used for the 2008 TALF	No new credit extensions after September 30, 2020 unless extended; Eligible collateral must be AAA-rated asset backed securities focused on recent commercial and consumer lending including auto loans; student loans; credit card receivables; equipment loans; SBA loans

Federal Government Assistance for Small Businesses

Small Business Administration Loans - 7(a)

The Small Business Administration (SBA) administers loan guaranty programs designed to encourage lenders to provide loans to small businesses that might not be eligible for traditional business loans through normal business channels. SBA's 7(a) loan program, authorized by Section 7(a) of the Small Business Act of 1953, is the agency's flagship loan guaranty program for providing financial assistance to small businesses. The 7(a) loan program has several subprograms as well, including the SBA Express, Export Express, and Community Advantage Pilot programs, which have their own eligibility requirements, terms, and benefits. The SBA relies on banks, credit unions and other specialized lenders for issuing loans.

Proposed Modifications to SBA 7(a) Loans under CARES Act - Paycheck Protection Program

The CARES Act proposes to create the Paycheck Protection Program for issuing covered loans to businesses to help retain workers during the COVID-19 crisis. Covered loans are any loans issued under this program between Feb 15, 2020 and September 30, 2020. Congress proposes funding \$349 billion for these loans.

Small Business Administration Loans - CDC

SBA's CDC/504 Loan program is designed as a long-term financing tool for economic development within a community. This Program provides growing businesses with long-term, fixed-rate financing to acquire fixed assets, such as land and buildings for expansion or modernization. The CDC/504 loans are available through Certified Development Companies (CDC), which are non-profit corporations that work with the SBA and private-sector lenders to provide financing to small businesses. CDC/504 loans are typically structured with the SBA providing 40% of the total project costs, a participating lender covering up to 50% of the total project costs, and the borrower contributing 10% of the project costs.

Program	Eligibility Requirements	Purpose	Amount	Application Process	Limitations
SBA - CDC	For-profit business operating in the US with tangible net worth less than \$15 million and average net income less than \$5 million	Primarily for fixed assets (not working capital or debt refinancing), including purchasing land and improvements or purchasing long-term machinery and equipment	Max of \$5 million	Apply through SBA approved lender. Typical application timing: 60 days	Must create or retain 1 job for every \$65,000 guaranteed by SBA or meet SBA community development or public policy goals

Small Business Administration Loans - 7(b)(2) Disaster Loans

SBA provides low-interest disaster loans to businesses of all sizes, private non-profit organizations, homeowners, and renters to repair or replace real estate, personal property, machinery and equipment, inventory and business assets that have been damaged or destroyed in a declared disaster; and to provide eligible small businesses necessary working capital to help overcome the economic injury of a declared disaster. Unlike other SBA loans that are available through approved lenders, SBA makes disaster loans directly from its Office of Disaster Assistance.

Program	Eligibility Requirements	Purpose	Amount	Application Process	Limitations
SBA 7(b) Disaster Loan	Any US business can apply for a disaster loan covering real property damage; Only small businesses with fewer than 500 employees can apply for a disaster loan for economic injury	Requires a formal disaster declaration by the President, administered by FEMA; Loans to support a business harmed or damaged by a disaster to cover either real property damage or economic injury	Max \$2 million	Apply online via SBA website	Must apply within specified deadlines from the date of the disaster declaration

State and Municipal Relief Programs

Several states and municipalities are offering emergency grants and low-interest loans with favorable repayment terms to small businesses that have experienced a decrease in revenue because of the COVID-19 outbreak. For example, New York City is offering both the Employee Retention Grant Program for businesses struggling to retain employees and a Small Business Continuity Fund Loan for businesses that have seen at least a 25% decrease in revenue. Maryland, Wisconsin, Minnesota, Florida, Los Angeles, San Francisco, Chicago and Denver have all announced similar grant or loan relief for coronavirus-affected small businesses.
